Sun Certified System Administrator For Solaris 10 Study Guide (Exams CX-310-200 & CX-310-202) (Certification Press) By Paul Sanghera. Bargaining with checking out habit is no need. Checking out Sun Certified System Administrator For Solaris 10 Study Guide (Exams CX-310-200 & CX-310-202) (Certification Press) By Paul Sanghera is not type of something sold that you could take or not. It is a thing that will certainly alter your life to life a lot better. It is the many things that will certainly offer you many points around the globe as well as this cosmos, in the real world and below after. As exactly what will certainly be given by this Sun Certified System Administrator For Solaris 10 Study Guide (Exams CX-310-200 & CX-310-202) (Certification Press) By Paul Sanghera, just how can you negotiate with the thing that has many perks for you?

Do you ever before know the e-book Sun Certified System Administrator For Solaris 10 Study Guide (Exams CX-310-200 & CX-310-202) (Certification Press) By Paul Sanghera Yeah, this is an extremely intriguing e-book to check out. As we informed recently, reading is not type of obligation activity to do when we need to obligate. Reviewing should be a behavior, an excellent routine. By checking out *Sun Certified System Administrator For Solaris 10 Study Guide (Exams CX-310-200 & CX-310-202) (Certification Press) By Paul Sanghera*, you could open up the new globe and also get the power from the world. Everything can be obtained through guide Sun Certified System Administrator For Solaris 10 Study Guide (Exams CX-310-200 & CX-310-202) (Certification Press) By Paul Sanghera Well briefly, publication is quite effective. As what we provide you here, this Sun Certified System Administrator For Solaris 10 Study Guide (Exams CX-310-200 & CX-310-202) (Certification Press) By Paul Sanghera is as one of reviewing book for you.

By reviewing this e-book Sun Certified System Administrator For Solaris 10 Study Guide (Exams CX-310-200 & CX-310-202) (Certification Press) By Paul Sanghera, you will get the finest thing to acquire. The brand-new point that you don't should invest over cash to get to is by doing it by on your own. So, what should you do now? Visit the link web page and also download guide Sun Certified System Administrator For Solaris 10 Study Guide (Exams CX-310-200 & CX-310-202) (Certification Press) By Paul Sanghera You can obtain this Sun Certified System Administrator For Solaris 10 Study Guide (Exams CX-310-200 & CX-310-202) (Certification Press) By Paul Sanghera by online. It's so easy, isn't really it? Nowadays, technology truly assists you tasks, this on the internet publication [Sun Certified System Administrator For Solaris 10 Study Guide \(Exams CX-310-200 & CX-310-202\) \(Certification Press\) By Paul Sanghera](#), is also.

SUN CERTIFIED SYSTEM ADMINISTRATOR FOR SOLARIS 10 STUDY GUIDE (EXAMS CX-310-200 & CX-310-202) (CERTIFICATION PRESS) BY PAUL SANGHERA PDF

Primarily Written for those who want to earn the Sun Certified System Administrator (SCSA) certification for Solaris 10, this guide presents full coverage of the official objectives for both the required exams: CX-310-200 and CX-310-202. In spite of the laser sharp focus on the exam objectives, this is not a cram style book. Written in a classroom-based teaching style, this book presents material in a sequential fashion: topics and chapters build upon the previously covered topics and chapters. There is no hopping from topic to topic. An introductory chapter for beginners and a cohesive, concise, yet comprehensive presentation of the material makes it a self contained book that requires no prior experience in Solaris or UNIX. Even after passing the exam, you will find yourself coming back to use this book as an on-the-job reference.

Full coverage of exam topics includes:

- Basic and advanced Solaris 10 installation
- Managing file systems and core dumps
- Performing user and security administration
- Managing network printers and system processes
- Performing system backups and restores and managing storage volumes
- Managing naming services
- Managing role based access control and system messaging
- Understanding fundamentals of TCP/IP networking and managing network services

The book features complete details on all exam objectives, 250+ practice questions, step-by-step exercises, on-the-job elements, a two-minute drill at the end of each chapter that reviews the key points in the chapter, and chapter self-tests. The CD contains MasterExam practice exam software with all new questions, a Searchable electronic book, and a second practice exam (with free online registration).

Good

By Antalia

Nice book, enough to pass the test probably. Very very basic topics on Solaris, how to install, navigate, manage devices, create directories, perform backups, etc. Very good for beginners. Nothing specific on Solaris architecture x86 or SPARC boot process or PROM, or anything on hardware, which is ok because the book is designed for administrators. For stuff like I think Sun books are the best. However, administrators should also be able to perform necessary steps on configuring new devices, mapping and managing external storage. This book barely covers external storage mapping or hardware installation and configuration.

Good explanation on installation of Solaris 10, configuring network and file systems. Certainly one of the best books for the beginners.

Solaris 9 SCSA guide NOT a Solaris 10 guide

By William D. Pool

I'd say this book, is one of the worse SCSA study guides I've read.

*So, far I've corrected a good amount of the selftest questions/answers.

*VERY limited information about SMF. There's TONS of information that's 9 related. Statements about starting SSHD via /etc/init.d/sshd SORRY Solaris 10 uses 'svcadm -v enable ssh' NOT an init script. Coverage on setting up rlogin/rsh tools with no password. However, NO mention of SSH doing the same over an encrypted line. Talk about misleading! The covering of inetd implies that you can use the 'standard' /etc/inet/inetd.conf script. NO mention of the inetconv only the inetadm. There's also NO mention of the '-r' flag that starts everything that a service needs. Hence, 'svcadm -v enable -r nfs/server'.

*What's with 'how to setup NIS'? NIS is DEAD that's POOR material for Solaris 10 (maybe 7/8), how about LDAP setup coverage? Even Sun has dropped support of NIS. They don't provide the ldap client SMF mention in the book. They suggest the client is started with the 'ldapclient' command where it's 'ldap.client'. MOST things he implies are standard init scripts where MOST are wrappers for SMF. This SHOULD be mentioned since most newbies will probably miss it.

*SVM coverage doesn't really explain 'how' to create volumes. The tools they mention in a setup (how to do it) use SMC MOST people or seasoned SAs will use the command line tools. There's NO mention to the fact two disk mirror of the root doesn't work right in Solaris 10 (known bug and waiting patch for).

*The coverage of Jumptart & Zones are fast and brief. It's more like a 'summary' then an actual insight of the two.

Page: 160

Question 2.)

Correct answer should be A, BUT the device name is incorrect it should be.

/dev/rdisk/c0d0s0 NOT /dev/rdisk/c0d0s3

Page: 161

Question 7.) Grammatical error: 'mountall' command should be 'umountall'

Page: 178

There is NO -D useradd default option for "shell" never has probably never will be.

useradd -D -s /bin/ksh does NOT work there IS NO -s command.

I'm using Solaris Express Nevada latest release and it doesn't have it either. Someone thinking Linux?

Page: 210

There is NO /etc/init.d/sshd for Solaris 10 EVER! It's always been

svcadm -v enable ssh

Someone was clearly thinking Solaris 9 on this.

Page: 229

Question 11: The "real" correct answer is B, head will report the 'first three' most recent reboot commands, last will report the 'first' from the creation date of the file.

Page: 498

Question 4.)

Should A,B,C be within /etc/security/ NOT just /etc/?

These are the 'quick' skim from the book of notes I made. When I got tired I said I'd go back and make more corrections, but haven't had the chance yet. Probably won't get what I needed out of the book which wasn't much.

I can go on and on.

Don't waste your time on this book. If you're a 'newbie' to Solaris, great. If you're a seasoned SA looking for "Real 10" material, read all the docs.sun.com Solaris 10 information. However, save your money and attempt the Bill Calkins release (still being delivered to me, hopefully better than this waste of money) or as mentioned docs at Sun. This is a total disappointment for anyone 'really' wanting to know the juice of Solaris 10. Coming for a guy who's wrote a lot of stuff for BigAdmin and what not this is a waste. Contact me if you want 'specifics' on this search for William Pool rotaecho@yahoo.com

Good baseline skills for the exam but will not make you pass

By M. Lucash

This book is a good read and has some great information but it will not help you pass the certification test. Knowing everything in the book and the quiz answers will get you to about 45% on the test and the rest is found either through experience or the Sun website.

I did use this book for my studies as did a number of my co-workers. It is helpful but don't count on it ace the test.
