Much better work exists - for the investment.

By dw

I didn't do a very good job checking out this book before purchasing.

I usually do a more thorough review of an author's background.

Brother George lays out some of the rudimentary facts concerning the pagan and occult elements which over many years have been added to the recipe of Catholicism.

However, chapter 2 is a classic discourse teaching of Calvinism.

And if you know anything about this, you know that to ask a devout Calvinist to critique Catholicism is like asking a daughter to critique her mother.

A critique severely limited to say the least, as they both share the same taproot (Augustine) who you must already know is considered one of the premier examples of mixing neo-Platonism into Christianity, and here is where Plato's doctrine of full DDI came in as well.

The Internet Encyclopedia of Philosophy (Augustine)

- iep.utm.edu/a/augustin

and

Stanford Encyclopedia of Philosophy

- plato.stanford.edu/entries/immutability/

If your really interesting in looking under the hood of Catholicism get a copy of Dr. Walter J. Veith's "Wine of Babylon" and "Gathering the children". His work is at the professional level of research. You will not be disappointed!

Another awesome research work is
Pagan Christianity (Exploring the Roots of Our Church Practices)

Written by Frank Viola and George Barna.

This is not so much the detailed minutia of the pagan and occult principles and their roots, but more about where and how they are still residual in most of Christianity today.

outpouring of the Spirit for the building up of the body of Christ

By Stewart Molina

This author is one of several who were talented with the ability to put deep consideration of the Lord's economy into words. This book is outstanding, and I most highly recommend it for all Christians, but especially to those who are seeking to understand all the dimensions of Christ's greatest prophecy.

bad printing

By it

I have the hard back version. The printing quality is clear. The problem is that they have the text biased towards the spine so that the outer margin is 1.75 inches and the margin at the spine edge is 0.5 inches. This makes the type dip into the gully between the left and right page.
