The Running Bunny

By Daniel Bowen

Taylor (bunny shifter) is in the wrong place at the wrong time. He's given a choice and it's not an easy one. He's being guarded by federal agents (cat shifters) and resettled into Dalton Falls. In his new life Taylor is able to own and run his own place called 'The Running Bunny'.

Nevada is the son of Gabriel / Gabby, (vampire). Gabby was the red headed motor mouth that was discovered to be Christian's son. The story of that is in Montana's Vamp (Brac Pack 16), but no mention of even a pregnancy, just the possibility. Nevada's other dad is Montana (wolf), a big huge bald headed man. Nevada is a wolf, has been raised in the Brac Pack, trained with the sentries, and is coming out of a bad relationship. He relocates to Dalton Falls and of course meets his mate Taylor.

This is a story with a lot happening around Taylor and Nevada and not a lot of romance and down time for the two. There was very little about the new pack that's forming in Dalton Falls. It was nice to see Montana pop up and while he helped, for me it was unclear if he took over or if Matt stood up as an alpha should. Matt isn't written like Maverick where he has a hand in every pie. A story is lacking when a new alpha doesn't take front and center when action is going down. . . . Especially when it affects his pack mate.

All in all a good continuation but it doesn't shine like the Brac Pack Series. I did read Montana's story after this one, just get to the history, and that one was much better written. This series is new, it has room to grow.

May I just add how frustrating it is trying to find this series on Amazon. Goodreads lists the series and Amazon is delayed a good month behind Siren Publishing. The third book is out yet not on Amazon. And Lynn Hagen's page here on Amazon doesn't list this one. I wrote a complaint to Amazon to clear that up. - Dan's Wife

Note: Was the crime boss (cat shifter/lion shifter) the same one as mentioned in the Twin's story?

I was a bit confused about humans taking care of a drug bust yet I thought shifters had their own justice? If that's true how come cats are guarding him and the guy arrested is a cat shifter yet somehow the guy goes free. It was confusing.

Okay Series.

This series is just okay for me. Much like the first book in the series, it once again didn't have the charm and humor of the original series. I'm really kind of disappointed how the children of the original Brac Pack turned out. I did like Taylor and much like the original series, the mates in this one really steal the show. If I hadn't read Ms. Hagen's earlier work, I probably would have liked this one more. It's just hard not to compare the two series and reading this one just makes me want to go back and read her earlier works. I don't want a carbon copy of her earlier series, but I do wish she would go back to her old tried and true formula for writing books. If it ain't broke, don't fix it is my motto.

I've read several of the original Brac Pack series. The writing was fair throughout those, as well, and it's a fairly repetitive series. I suspect that'll be the case here, too. I don't know what made the author start with these characters two books in (after introducing others that were actually pretty interesting in the first one). It's pleasant brain candy, on whole, however; I'm sure I'll continue with Gen 2 anyway. The author is pretty dependable when I'm looking for some light escape from reality.
